DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 30, drawn to an implant, classified in class 623, subclass 23.53.
- II. Claims 12-29, drawn to a process of making an implant, classified in class 623, subclass 23.53.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as an apparatus and a process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the product can be made by a materially different process such as avoiding the step of controlling the anodic forming voltage transient with slope (dV/dt).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert J. Patch on October 26, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
